

THE HOSPITALITY OPERATING SYSTEM

Run a more profitable hospitality business — **from your phone.**

POS, kitchen, inventory, customers and reporting — one operating system for cafés, restaurants, hotels and chains.

Running hospitality shouldn't feel like firefighting.

Most owners lose money they never even see — to leakage, slow service, and blind spots across outlets.

01

Silent leakage & theft

Voids, discounts and post-payment edits quietly drain your margin.

02

Slow service

Queues, order mix-ups and lost kitchen chits cost you covers.

03

Staff dependency

The business stops the moment you're not on the floor.

04

No visibility

You can't fix what you can't see across every outlet.

There's a calmer, more profitable way to run it. →

ONE SYSTEM, NOT TEN TOOLS

One operating system. Every kind of outlet.

Sell & Serve Faster

POS, Captain app, KOT/KDS, Scan & Order and direct delivery — bill in seconds, even at peak rush.

Run the Whole Property

Hotel/room billing, food courts, offline mode — one consolidated checkout bill.

Bring Customers Back

CRM, loyalty, wallet, coupons and WhatsApp automation that lift repeat visits.

Protect Your Profit

Inventory, central stock, audit logs and smart validations stop leakage at source.

See Everything

Owner dashboard, reports, recipe-level P&L and GST/VAT — live, from anywhere.

AI that works on the floor — not in a pitch deck.

01

Menu in minutes

Upload your menu — AI builds items, categories and prices. Live in minutes, not days.

02

Catch what's hurting profit

AI auto-audits every report and flags voids, over-discounts and stock variance.

03

Lift every bill

AI suggests the right add-on at the right moment. Bigger average bills, automatically.

04

Win back customers

AI groups regulars, lapsed and big spenders for targeted WhatsApp offers.

Loud on results, quiet on the tech.
